My name is Angelica Latina, and I am running for the position of SCASLA President for the 2021-2022 school year. I am currently a junior in the Landscape Architecture program. I have had leadership and community service experience in the past and recently acquired some jobs and internship experiences in the professional field and in sustainability. Through those experiences and working with my peers, faculty, and others, I have come to learn what it takes to be a leader: someone who motivates, takes initiative, and listens. That is why if I were to become your President, I would value your needs, voice, and own experiences and use those to improve our Landscape Architecture program. These improvements would include a support system to not only the upper-division students exploring internship opportunities but also the future students of our program. When I was a sophomore, I came with many questions of what to expect of the program or if the path was right for me overall. That is why I would like to serve as a resource and interact with others to show how unique the Landscape Architecture major is and help with anything if I can. If I were to be your President my goals would be to:

- Find more ways to increase internship opportunities
- Ensure a worthwhile experience for board members
- Continue networking opportunities within the major, SED students, faculty, other schools, and professionals
- Provide workshops to further develop our skills
- Address changes within the program and curriculum needed to be made

And lastly and most importantly, as we transition into an in-person environment (hopefully), steal back the fun we could have had in the past year!

Thanks,
Angelica L
